EE422C Project 5 Team Plan

Arvin Bhatti ab62733

Kayla Tran knt627

Fall 2018

   We worked on most of the code together. However, for some parts, we divied up some of the tasks and came together and merged our codes. When problems arose, we would each write our own method or come up with our own solution for the problem. Then we would compare our solutions and choose the better option. We spent approximately 60 hours together. Arvin did Tekashi and Link and Kayla did Critters 1 and 2. The final testing was done together.
